## **118048 games played by 311 computers**

The Swedish Ratinglist may be quoted in other magazines, but we insist that this will be done in a correct way! We expect, that not only the rating figures, but also the number of games and the margin of error will be quoted.

Please read the **comment by the chairman**, Thoralf Karlsson. You may also **download the list** in DOS text format. Please note that this is a longer list, with almost all tested computers since SSDF began its work more than 10 years ago!

All games have been played on the tournament level, 40 moves/2 hours followed by 20 moves/each following hour. In matches between PC-programs, two separate PCs have been used, connected with an auto232-cable.

If you have any questions about the list you are welcome to **contact us**.
